

DEPLOYMENT RELEASE WORKPACKAGE

Generated by Antigravity Central System Orchestrator

Deployment Date:	2026-08-05 16:02:43	Git Branch:	main
Environment:	Production	Git Commit:	7146615
Deployer User:	gadabole	Release Status:	SUCCESS

5-Pillar Architecture Impact Assessment

Pillar Name	Core System Scope / Responsibility	Impact Status
Pillar 1: Engineering	Product Architecture & Codebase	VERIFIED
Pillar 2: Growth	SEO, Analytics, & Onboarding	ACTIVE
Pillar 3: Sales	Revenue & Subscription Flow	STAGED
Pillar 4: Support	FAQ, Docs, & Escalation Triage	STAGED
Pillar 5: Legal/Tax	Privacy Policies & Tax Rules	STAGED

Recent Commit Log

- commit 7146615 by Gagan Dabole on 2026-08-05**
feat: configure 5-pillar architectural governance and generate release audit workpackage PDF
- commit 6140cfc by Gagan Dabole on 2026-07-27**
fix: revert dashboard sharedUrl to use the correct viewer route and force dynamic rendering for all project pages and calendar feeds to prevent caching
- commit cd7d9fd by Gagan Dabole on 2026-07-27**
fix: match dashboard shared link and copy fields to use subscribe sub-route, aligning with the QR code destination

Automated Deployment Verification Checklist

- ✔ Next.js build compilation (Static optimization & SSR routing checked)
- ✔ ESLint & code quality audits (Static analysis checks verified)
- ✔ Database schema integrity check (Supabase migrations and API keys)
- ✔ API Route validation checks (Mock endpoints pinged with success status)
- ✔ 5-Pillar config manifest registration (All subagent definitions resolved)
- ✔ Pillar 2 Growth outreach sequences and B2B hero copy registered

Release Package Notes & Summary

This document confirms the successful setup of the generic 5-pillar architecture in the FlyerToCalendar project workspace. It establishes the central orchestration boundaries for all core business and development operations: Engineering & Product Architecture, Growth & Acquisition, Sales & Revenue, Customer Support, and Legal & Tax compliance. All subagent configuration files have been successfully scaffolded in the '.antigravity/pillars/' directory. Additionally, Pillar 2 Growth marketing sequence files (cold outreach emails, IG DMs, B2B landing page hero structure, and automated demo pipeline specs) have been successfully registered in '.antigravity/marketing/' to drive organizer acquisition.
